Rough-in Valves

Only the highest quality valves are used in the manufacturing of fluid faucets.

German-made Fluhs cartridges are featured in our volume controls and diverters and our thermostatic valves use internationally-renowned France-made Vernet cartridges.

Fluid uses a unique quick-connect elbow supply with shutoff for easy and dependable installation.

One-piece valve body casting is utilized to eliminate in-wall connections. Rough-in features a built-in level to ensure trims stay straight.
