IMPACTFUL

Decorative finishes come and go, but Matte Black has transcended the perception of trendiness and earned its rightful place alongside chrome and brushed nickel as a classic, with appeal that is timeless. If you want your fixtures to dramatically take centre stage, it has to be Matte Black.

VERSATILE

Nothing impacts the senses quite so dramatically and impactfully as black. Yet, it truly is a neutral in that it can be seamlessly paired with almost anything. Matte Black is the ultimate chameleon; setting the stage for anything from enigmatic drama to monochromatic simplicity, to outright whimsy, with simple changes of background colors.

Quick Clean Pop-Up | \$51
With removable basket

LUXURIOUS

Black is strong and purposeful, but Matte Black represents another level. Smooth, elegant and as gorgeous to the eyes as to the touch. This powerful finish is transformative, whether enhancing the elegance of polished stonework or bringing context and depth to natural woods.

CONTEMPORARY

Matte Black is a modern statement. Auto enthusiasts gravitate to Matte Black as it brings attention to the curves and presence of the vehicle. Similarly, matte black uniquely highlights the design of a faucet; accentuating the intersection of curves and contours, edges and angles. Cool, contemporary, creative.
