# why a bidet?

North America is finally starting to understand what Europe has known for decades; no bathroom is complete without a bidet.

Water is nature's cleaning tool. When an innovation saves money, supports the environment, and promotes improved health and hygiene, the question isn't why should you have a bidet, but rather, why wouldn't you? The fluid slim line bidet seat is the first step into better self-care.

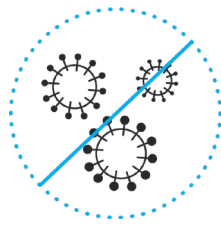

Isn't it time?

Remote Control

Heated Dryer

Antibacterial

Night Light

Deodorizer

Instantaneous Heating

Self Cleaning Nozzle

Heated Seat

Detachable Easy-Clean Seat

Ultra Thin Design

for comfort...

#### HEALTH

We don't clean dirty hands or the rest of our body with dry paper, so why is it a good idea in the bathroom? Warm water will improve cleanliness where and when you need it most. While a bidet seat optimizes health for everyone, it can be particularly beneficial for seniors or those experiencing mobility issues.

#### SUSTAINABILITY

The small amount of water used helps to drastically reduce the amount of paper used, saving trees and decreasing the stress on wastewater treatment plants. The remote or unit controls allow you to use the cleaning and drying functions efficiently and without waste.

#### DESIGN

The BID1000W features instantaneous hot water heating that doesn't require a bulky storage tank. So, this bidet seat offers a sleek, slim line profile that will fit and compliment most elongated toilets. Comfort driven design includes variable temperature settings for the heated seat and warm water, plus a dryer fan, night light and easy to clean removable seat.

# fluid Bidet Seats

BID1000W – \$798<sup>USD</sup>

## Bidet Seat

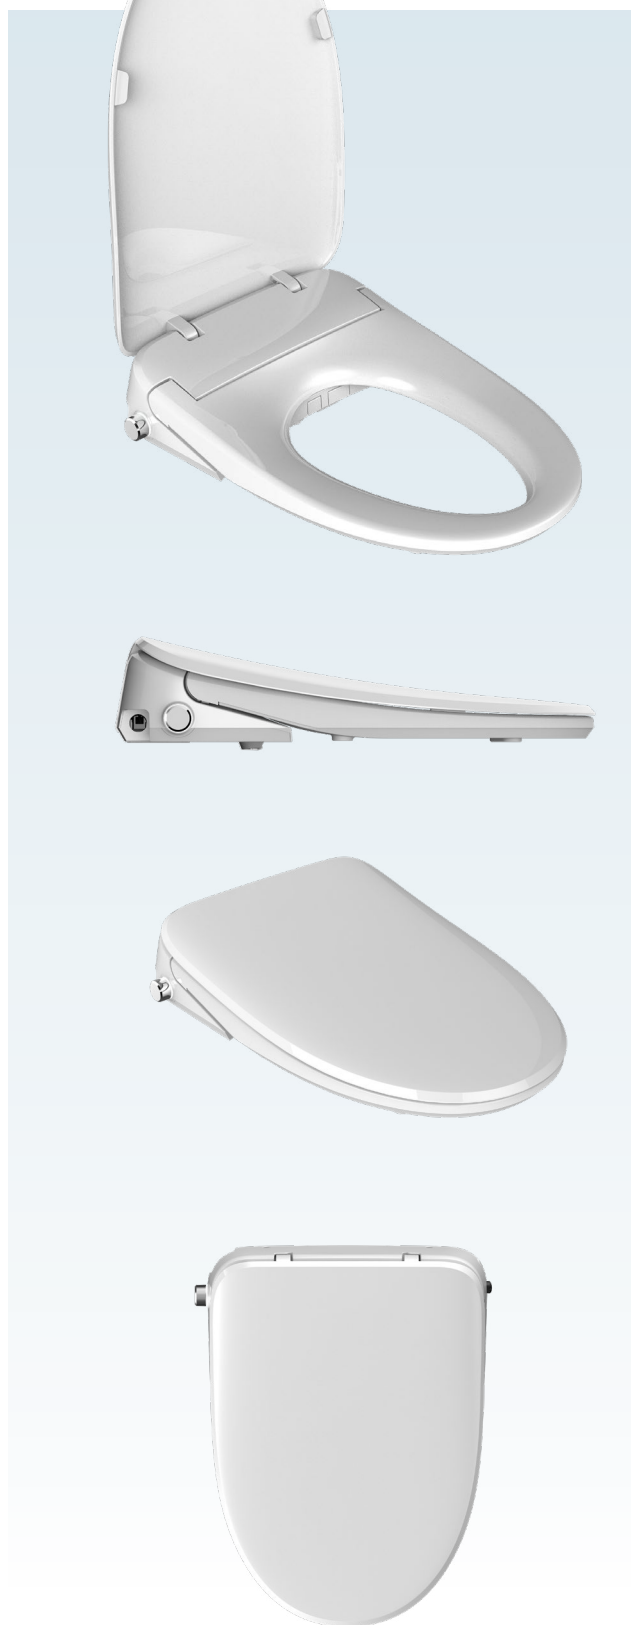

### Features:

- Deodorizer
- 3 Rinse Spray Patterns
- Variable Heated Dry Settings
- 5 Water Temperature Adjustments
- Antibacterial
- Heated Seat
- Night Light
