

nano technology for **everyday cleanliness...**

Conventional Glaze

nano Gloss

The water droplet on the left is sitting on untreated vitreous china, while the droplet on the right is sitting on the same surface that has been **treated with nano gloss**. The glazing prevents the droplet from spreading out. Nano technology literally repels water, greases and germs, making surface areas cleaner and more hygienic.

nano gloss...

- **Alters the surface** of vitreous china with nano technology to keep the surface cleaner for longer
- More Hygienic and **easier to clean**
- Repels liquids and **inhibits the spread** of germs and bacteria

nano gloss is suitable for:

- Commercial buildings
- Healthcare facilities
- Restaurants and Hotels
- Transportation Centers
- Entertainment Complexes
- Sporting Venues
- Universities and Public Schools
- Multifamily Rentals
- Care Homes
